manfor@cs.washington.edu

- Industry experience in: C, C++, Python, JavaScript, GDB, Docker, FreeRTOS, ESP32, KiCad.
- Academic experience in: Rust, Java, Typescript, SystemVerilog, SQL, Arduino.
- Native speaker of English and Polish.

EDUCATION

Master's in Computer Science & Engineering — University of Washington 2022 - Expected June 2027

- Combined BS/MS at Paul G. Allen School of Computer Science & Engineering.
- GPA: 3.89
- Key courses: Machine Learning, Systems Programming, Digital Design, Data Visualization, Security, Operating Systems, Distributed Systems, Networks, Linguistics, Computer Vision, Data Management.

EXPERIENCE

Software Engineering Intern — WiBotic

June 2024 - September 2024

- Programmed a new multi-threaded real-time [CAN-to-ethernet adapter](#).
- Built an intuitive fullstack web app for remotely configuring this adapter.
- Designed and built a PCB to power and test microcontrollers on a shared CAN bus.
- Created an integration test suite that caught bugs in a large C++ codebase.

Computer Science Teaching Assistant — University of Washington

January 2025 - April 2026

- Helped create and teach a new course called CSE 493L/334 (Concurrency, Parallelism, and Rust).
- Designed auto-graded assignments that introduce students to cache coherence, async/await, multi-threading, dataflow, etc.
- Helped teach CSE 351 (Hardware/Software Interface). Covers caching, C, virtual memory, etc.

PROJECTS

YouTube educator

2022 - Present

- [The "Just One More Paradox"](#) - Over 3 million views. [Animated](#) with Python.
- [PCB Magnetorquer Prototype - Husky Satellite Lab](#) - Includes [optimization code I wrote](#).

Student organizations — University of Washington

2022 - Present,

- At UW Husky Flying Club, lead a team in building remotely-operated [aerial vehicles](#).
- Created marketing websites that auto-deploy using GitHub continuous integration: [UW Competitive Programming Club \(code\)](#), [Husky Satellite Lab \(code\)](#), [personal site \(code\)](#).
- At Husky Satellite Lab [programmed](#) a high-altitude balloon payload.
- Competes on a team in ICPC (International Collegiate Programming Contest) regionals.

Independent projects

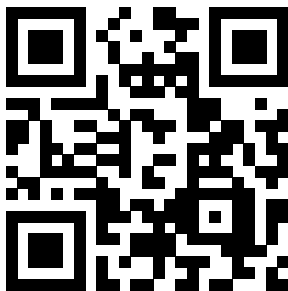

2022 - Present

- Creates open source projects such as [Gday](#), a tool for encrypted peer-to-peer file transfer.
- Published an interactive web assembly [simulation](#).
- FCC-certified amateur radio operator.
